Journal of Materials Processing Technology 88 (1999) 296–299

Journal of Materials Processing Technology

Subject Index of Volume 88

Ablative composite
studies on the machining of carbon/phenolic ablative composites, 43
Aerofoil forging
experimental and theoretical analysis of deformation and microstructural evolution in the hot-die forging of titanium alloy aerofoil sections, 251
Al/SiCp composites
analysis of chip breaking during orthogonal machining of Al/SiCp composites, 90
Austempered ductile iron
cutting austempered ductile iron using an EDM sinker, 83

Bead geometry
application of response surface methodology for predicting weld bead quality in submerged arc welding of pipes, 266
Bead on plate
application of response surface methodology for predicting weld bead quality in submerged arc welding of pipes, 266

CBN tool
wear characteristics in turning high hardness alloy steel by ceramic and CBN tools, 114
Central composite rotatable design
application of response surface methodology for predicting weld bead quality in submerged arc welding of pipes, 266
Ceramic tool
wear characteristics in turning high hardness alloy steel by ceramic and CBN tools, 114
Chip breaking
analysis of chip breaking during orthogonal machining of Al/SiCp composites, 90
Collar-drawing
influence of punch shapes on the collar-drawing process of sheet steel, 134
Constitutive relationship
a study on the deformation of metals, 1
Creep
600°C creep analysis of metals using the Moiré interferometry method, 185
Cutting conditions
design of spiroid hobs, 208
Cutting forces
studies on the machining of carbon/phenolic ablative composites, 43
Cylinder Bores
formation of a wear resistant surface on Al by laser aided in-situ synthesis of $MoSi_2$, 169

Deformation
a study on the deformation of metals, 1
Degree of brittleness
an empirical equation for crack formation in the laser cutting of ceramic plates, 154
Die design
an expert system of progressive die design for electron gun grid parts, 216
Dressing
decision of dressing interval and depth by the direct measurement of the grinding wheel surface, 190
Dual-stream function
analysis of the shape rolling of a V-sectioned sheet by the dual-stream function method, 33
Dual-stream function method
an investigation into the plastic deformation behavior at the roll gap during plate rolling, 97

Eddy current sensor
decision of dressing interval and depth by the direct measurement of the grinding wheel surface, 190
EDM-sawing
cutting austempered ductile iron using an EDM sinker, 83
EDM sinker
cutting austempered ductile iron using an EDM sinker, 83
Elasto-plastic
influence of punch shapes on the collar-drawing process of sheet steel, 134
Electron gun
an expert system of progressive die design for electron gun grid parts, 216
Empirical equations
an empirical equation for crack formation in the laser cutting of ceramic plates, 154
Engineering ceramic
material-removal-rate analysis in the ultrasonic machining of engineering ceramics, 180

Finite element
experimental and theoretical analysis of deformation and microstructural evolution in the hot-die forging of titanium alloy aerofoil sections, 251
Finite elements
an effective split of flow and die deformation calculations of aluminium extrusion, 67
influence of punch shapes on the collar-drawing process of sheet steel, 134
Fluid pressure
a note on hydroforming with constant fluid pressure, 51
Form error
shape prediction during the cylindrical traverse grinding of a slender workpiece, 23
Friction
the effect of scaling on interfacial friction in hot rolling of steels, 105

Elsevier Science S.A.

Gaussian method
surface roughness measurement using an optical system, 10
Geometry
design of spiroid hobs, 208
effect of the geometry and the surface treatment of punching tools on the tool life and wear conditions in the piercing of thick steel plate, 122
GMAW
heat-affected zone softening in high-strength low-alloy steels, 284
Grain boundary sliding
a study on the deformation of metals, 1
Grain size
a study on the deformation of metals, 1
Grid parts
an expert system of progressive die design for electron gun grid parts, 216
Ground ceramic
evaluation of surface and sub-surface cracks of ground ceramic, 222
GTAW
heat-affected zone softening in high-strength low-alloy steels, 284

Hardness
an empirical equation for crack formation in the laser cutting of ceramic plates, 154
Heat-affected zone softening
heat-affected zone softening in high-strength low-alloy steels, 284
High hardness alloy steel
wear characteristics in turning high hardness alloy steel by ceramic and CBN tools, 114
High pressure
the effects of high-pressure assistant-gas flow on high-power CO_2 laser cutting, 57
High-temperature holographic grating
600°C creep analysis of metals using the Moiré interferometry method, 185
Hot bar rolling
the temperature, roll force and roll torque during hot bar rolling, 147
Hot deformation
modeling of grain size in superalloy IN718 during hot deformation, 244
Hot rolling
the effect of scaling on interfacial friction in hot rolling of steels, 105
Hydroforming
a note on hydroforming with constant fluid pressure, 51

IN718
modeling of grain size in superalloy IN718 during hot deformation, 244
Industrial lasers
an empirical equation for crack formation in the laser cutting of ceramic plates, 154
In-situ formation
formation of a wear resistant surface on Al by laser aided in-situ synthesis of $MoSi_2$, 169

Laser cutting
the effects of high-pressure assistant-gas flow on high-power CO_2 laser cutting, 57
Laser displacement sensor
decision of dressing interval and depth by the direct measurement of the grinding wheel surface, 190
Laser melted zone (LMZ)
formation of a wear resistant surface on Al by laser aided in-situ synthesis of $MoSi_2$, 169
Laser quenching
experimental study of the laser quenching of 40CrNiMoA steel, 77

machining temperature
cutting temperature: prediction and measurement methods—a review, 195
manufacture
cutting temperature: prediction and measurement methods—a review, 195
Material
a study of strain localization by means of reduced gage compression testing, 276
Material models
an effective split of flow and die deformation calculations of aluminium extrusion, 67
Mathematical models
application of response surface methodology for predicting weld bead quality in submerged arc welding of pipes, 266
Mechanism
material-removal-rate analysis in the ultrasonic machining of engineering ceramics, 180
metal cutting
cutting temperature: prediction and measurement methods—a review, 195
Microstructure
modeling of grain size in superalloy IN718 during hot deformation, 244
Microstructure evolution
experimental and theoretical analysis of deformation and microstructural evolution in the hot-die forging of titanium alloy aerofoil sections, 251
Model
material-removal-rate analysis in the ultrasonic machining of engineering ceramics, 180
Modeling
modeling of grain size in superalloy IN718 during hot deformation, 244
Moiré interferometry
600°C creep analysis of metals using the Moiré interferometry method, 185
Molybdenum disilicide
formation of a wear resistant surface on Al by laser aided in-situ synthesis of $MoSi_2$, 169
$Mo(Si,Al)_2$
formation of a wear resistant surface on Al by laser aided in-situ synthesis of $MoSi_2$, 169

Nano-particles
formation of a wear resistant surface on Al by laser aided in-situ synthesis of $MoSi_2$, 169
Necking
influence of punch shapes on the collar-drawing process of sheet steel, 134
Neutral point
an investigation into the plastic deformation behavior at the roll gap during plate rolling, 97

Optical method surface roughness measurement
surface roughness measurement using an optical system, 10
Optimization
experimental study of the laser quenching of 40CrNiMoA steel, 77

Orthogonal experimental design
experimental study of the laser quenching of 40CrNiMoA steel, 77
Orthogonal machining
analysis of chip breaking during orthogonal machining of Al/SiCp composites, 90

Physical vapor deposition
cutting performance of different coated twist drills, 203
Piston head
experimental study of the laser quenching of 40CrNiMoA steel, 77
Plate rolling
an investigation into the plastic deformation behavior at the roll gap during plate rolling, 97
Process parameters
application of response surface methodology for predicting weld bead quality in submerged arc welding of pipes, 266
Profiling
design of spiroid hobs, 208
Punching tools
effect of the geometry and the surface treatment of punching tools on the tool life and wear conditions in the piercing of thick steel plate, 122

Rate dependency
an effective split of flow and die deformation calculations of aluminium extrusion, 67
Reduced-gage compression testing
a study of strain localization by means of reduced gage compression testing, 276
Roll force
the temperature, roll force and roll torque during hot bar rolling, 147
Roll torque
the temperature, roll force and roll torque during hot bar rolling, 147
RSM
application of response surface methodology for predicting weld bead quality in submerged arc welding of pipes, 266

Scale
the effect of scaling on interfacial friction in hot rolling of steels, 105
SDGF values
surface roughness measurement using an optical system, 10
Semi-solid forging
the effect of strain rate on macroscopic behavior in the compression forming of semi-solid aluminum alloy, 159
Semi-solid materials
the effect of strain rate on macroscopic behavior in the compression forming of semi-solid aluminum alloy, 159
Shape generation
shape prediction during the cylindrical traverse grinding of a slender workpiece, 23
Shape rolling
analysis of the shape rolling of a V-sectioned sheet by the dual-stream function method, 33
SMAW
heat-affected zone softening in high-strength low-alloy steels, 284
Solid fraction
the effect of strain rate on macroscopic behavior in the compression forming of semi-solid aluminum alloy, 159
Spiroid hobs
design of spiroid hobs, 208
Steel
the effect of scaling on interfacial friction in hot rolling of steels, 105
Strain
600°C creep analysis of metals using the Moiré interferometry method, 185
Strain localization
a study of strain localization by means of reduced gage compression testing, 276
Strain rate
a study on the deformation of metals, 1
Sub-surface cracks
evaluation of surface and sub-surface cracks of ground ceramic, 222
Superplasticity
a study on the deformation of metals, 1
Surface cracks
evaluation of surface and sub-surface cracks of ground ceramic, 222
Surface defects
the effect of scaling on interfacial friction in hot rolling of steels, 105
Surface treatment
effect of the geometry and the surface treatment of punching tools on the tool life and wear conditions in the piercing of thick steel plate, 122

Temperature
studies on the machining of carbon/phenolic ablative composites, 43
Thermal–plastic
experimental and theoretical analysis of deformation and microstructural evolution in the hot-die forging of titanium alloy aerofoil sections, 251
TiCN-surface multilayer coating
cutting performance of different coated twist drills, 203
TiN-surface monolayer coating
cutting performance of different coated twist drills, 203
TiN-surface multilayer coating
cutting performance of different coated twist drills, 203
Titanium alloy
experimental and theoretical analysis of deformation and microstructural evolution in the hot-die forging of titanium alloy aerofoil sections, 251
Tool life
effect of the geometry and the surface treatment of punching tools on the tool life and wear conditions in the piercing of thick steel plate, 122
Tool wear
studies on the machining of carbon/phenolic ablative composites, 43
Traverse grinding
shape prediction during the cylindrical traverse grinding of a slender workpiece, 23

Ultrasonic machining
material-removal-rate analysis in the ultrasonic machining of engineering ceramics, 180
Upper and lower bounds
a note on hydroforming with constant fluid pressure, 51

V-sectioned sheet
analysis of the shape rolling of a V-sectioned sheet by the dual-stream function method, 33

Wear
effect of the geometry and the surface treatment of punching tools on the tool life and wear conditions in the piercing of thick steel plate, 122
wear characteristics in turning high hardness alloy steel by ceramic and CBN tools, 114

Wheel topography
decision of dressing interval and depth by the direct measurement of the grinding wheel surface, 190
